ITT Systems Employees in Iraq Team Up With U.S. Military to Provide Local Children with School Supplies

Colorado Springs, Colo., October 29, 2009 – For safety reasons, ITT Corporation (NYSE:ITT) employees working on the Global Maintenance and Supply Services (GMASS) Task Order 2 program at Joint Base Balad, Iraq can't freely venture outside of the military base where they maintain and upgrade vehicles, but that doesn't keep them from equipping local Iraqi children to succeed in school.

ITT Systems Division staff at Balad organized a fundraising competition, with a pizza party going to the winning team, as part of an effort to purchase backpacks and school supplies. In just two weeks, they raised \$3,700 to purchase colorful school backpacks and partnered with the U.S. Army's 1-402nd Field Support Brigade and 37th Engineer Battalion to provide paper, pencils, paints, a toy and some candy to fill the backpacks.

Once the materials were purchased, ITT employees, working during their off-duty hours, stuffed the packs with the supplies and turned them over to U.S. Army personnel at Joint Base Balad for distribution to children at a school about 10km from the base. Since the ITT Balad team ended up exceeding their original fundraising goal, they are already working to prepare a second batch of supplies for schoolchildren in another local Iraqi town.

"Hopefully our efforts will help the military build relations in the surrounding area, encourage the local children, and make the area safer for soldiers, civilians and Iraqis in the long run," said ITT Systems Program Manager Jeff Meo.

ITT Systems Division, headquartered in Colorado Springs, Colo., is a world leader in providing operations, maintenance and logistics support for U.S. military systems, facilities, vehicles, ranges and networks around the globe.

About ITT Corporation

ITT Corporation (NYSE: ITT) is a high-technology engineering and manufacturing company operating on all seven continents in three vital markets: water and fluids management, global defense and security, and motion and flow control. With a heritage of innovation, ITT partners with its customers to deliver extraordinary solutions that create more livable environments, provide protection and safety and connect our world. Headquartered in White Plains, N.Y., the company generated 2008 sales of \$11.7 billion. www.itt.com
