### Fluor-ITT Team One of Two Winners on US Army LOGCAP IV Task Order

**Colorado Springs, CO, July 8, 2009** – The U.S. Army Sustainment Command (ASC) announced it has awarded the Logistics Civil Augmentation Program (LOGCAP) IV, Task Order 5 – North contract to Fluor and its teammate ITT. This award is for \$1.5 Billion for the one-year base period, and includes four one-year options for a total value of up to \$7.5 Billion. The annual Task Order value for ITT is estimated to be \$251 Million, and with all options exercised is valued at \$1.3 Billion. Over the course of the period of performance, the actual value will be governed by the work required by the US Government. ITT’s work will be performed in Afghanistan with program management oversight provided by ITT Systems Division personnel, headquartered in Colorado Springs.

Task Order 5 (TO5) supports U.S. Army and Allied Forces contingency operations and logistics requirements in the northern regions of Afghanistan. The task order will provide a broad range of essential logistics support services during combat and peacekeeping operations, humanitarian operations, and training operations. Partnered with Fluor, ITT will provide facilities services, food services, supply support, central issue facility operations, transportation, fire fighting and prevention, air field operations and management, movement control operations, badging and screening support, shuttle bus services, wash rack operations, and forward distribution logistics support services.

“ITT is excited to be teamed with Fluor on this opportunity to provide mission-critical contingency support to our troops” stated Michael Gulino, President and General Manager of ITT Systems Division. “Providing LOGCAP support services will continue our long track record of best value logistics and support services so vital to the success of America’s Warfighters and our deployed troops.”

The mission of the ASC is to provide logistics and technology support from the strategic through the operational to the tactical level. ASC streamlines and accelerates logistics support to commanders and troops in the field worldwide.

### **About ITT Corporation**

ITT Corporation is a high-technology engineering and manufacturing company operating on all seven continents in three vital markets: water and fluids management, global defense and security, and motion and flow control. With a heritage of innovation, ITT partners with its customers to deliver extraordinary solutions that create more livable environments, provide protection and safety and connect our world. Headquartered in White Plains, N.Y., the company generated 2008 sales of \$11.7 Billion.
